I PROPOSE TO CONSIDER THE QUESTION, "CAN MACHINES THINK?"

ALAN TURING - 1950

Introduction

I also propose to consider the question, “Can machines think?” Instead of approaching this question through a thought experiment like Turing¹ did, nowadays one can approach this question by prompting it to a search engine.

When prompting this question to popular web search engines we get different results:

¹ A. M. TURING. I.—COMPUTING MACHINERY AND INTELLIGENCE. *Mind*, LIX(236):433–460, 1950. ISSN 0026-4423. DOI: 10.1093/mind/LIX.236.433. URL <https://doi.org/10.1093/mind/LIX.236.433>

Information Retrieval using Relational Databases

THE PAGES of a book are usually divided into three major sections: the front matter (also called preliminary matter or prelim), the main matter (the core text of the book), and the back matter (or end matter). Which is about information retrieval

WE CAN ONLY SEE A SHORT DISTANCE AHEAD, BUT WE CAN SEE PLENTY
THERE THAT NEEDS TO BE DONE.

ALAN TURING

Conclusion

We finalize
